Achilles

The Clear PVC Innovators

0.75mm DS Clear

Rollclear PVC glazing is the perfect solution to ensure outdoor enjoyment no matter what the weather brings. Achilles is the leading brand of UV stabilised clear PVC blinds and is ideal for café blinds, as well as commercial and residential applications. The result is a functional and aesthetically pleasing solution. Achilles Rollclear is manufactured to provide a high quality, clear finish.

The Benefits of Using Rollclear

- UV stabilised
- Proven field performance
- Non-stick formulation (SLS)
- FR compliant product available
- High clarity
- Supported with a 2 Year UV Warranty

Rollclear DS is the latest innovation from Achilles. One of the biggest challenges with any clear PVC products is instability. Without any reinforcing, PVC is susceptible to expansion and contraction. This issue is well known to the market but there has never been a solution until now. Achilles have developed a solution to keep the product stable providing endless benefits. Once again Achilles clear PVC raises the bar for performance and functionality.

The Benefits of Using Rollclear DS

- No down time waiting for the fabric to relax prior to fabrication
- Allows for the clear to be run horizontally with a single join rather than multiple vertical joins
- Provides a taught finish from day one rather than allowing for estimated expansion and contraction
- Helps eliminate long-term wrinkles
- Easy solution when used with a track guided blind system or vertical zippers

Also available in the Achilles collection is **Rollglass Plus**. A clear PVC range that uses the unique extruded manufacturing process that results in exceptional clarity. Contact your account manager for further details.

DS Performance Comparison

Taking Steps to a Cleaner Future

As the world becomes more conscious of healthy living and our impact on the environment, products are evolving with change. Across the globe, third party organisations are setting up a framework for product evaluation and certification. Europe is leading the way with their REACH (Registration, Evaluation, Authorisation of Chemicals) program. REACH is a European community regulation on chemicals and their safe use. It places greater responsibility on industries to manage the risks from chemicals. Manufacturers must provide data of their raw materials and demonstrate that the ingredients they use are safe and provide minimal impact on the environment.

Achilles is aware of its responsibilities towards people and the environment. As a result, they have decided to embrace the REACH program and have made formulation adjustments to comply with the stringent REACH requirements. All Achilles products are now manufactured with a safer, more environmentally friendly formulation. This positive step is just another reason why Achilles are the world leader in clear PVC products.
