

INFINITY

The refinement of a seamless fabric

Imagine the possibilities...

Infinity range

Infinity by Dickson® offers a new definition for broad-span awnings. Its extra-wide 3.2 metre span allows you to create extremely stylish & seamless solar protection awnings. Its unique woven structure ensures similar warp and weft resistance. The awning is composed of a single piece of fabric, preventing variations in thickness and reducing distortions. Available in 12 plain colors, Infinity will add extra charm to your terrace.
