COMPANY PROFILE

PROFILE

NOLAN CARPETS – ABOUT THE TOLI PARTNERSHIP

In 1919, TOLI Corporation was established in Itami, Japan. Over a century later the company has grown to be one of the largest floor covering manufacturers in the world. The TOLI product range is exported all over the globe and has a proven history of success. Independent reports position TOLI in the top five carpet tile manufacturers worldwide.

The TOLI design team have taken innovation to new heights. Their unique designs and concepts have resulted in six 'Good Design' awards over the past decade. TOLI was the first to market with a 'plank' shaped carpet tile in 2006.

Design and innovation are important, but performance is paramount. Like all Japanese manufacturers, TOLI prides itself on using 'cutting edge' technology to produce high quality products. They have five 'state of the art' manufacturing facilities, each playing an integral role in producing their comprehensive product range. Each range is put through rigorous testing and is supported with a 15-year performance warranty.

Nolan Carpets are proud to be the exclusive Australian partner of TOLI Corporation. Our partnership is based on common values including longevity, quality and innovation.

ENVIRONMENTAL STATEMENT

The Nolan Carpets Tile Collection has been developed with a sense of social responsibility and commitment to the environment. From the manufacturing process through to post-life stewardship, consideration has been given to the direct impact on the environment.

Nolan Carpet tiles meet some of the most stringent requirements worldwide, however the hard work does not stop there. Our manufacturing partner, TOLI, is committed to formal environmental management plans with a long term commitment to sustainability.

Green Label certification is part of the Carpet and Rugs Institute (CRI) in the United States. The CRI mission is to educate consumers, commercial stakeholders, and the industry in general about carpet and rugs in the context of environmental awareness. Green Label is an internationally recognised environmental certification scheme which has been in place for over two decades. Green Label 'Plus' is the highest level available under this scheme. The Nolan Carpet Tile Collection is Green Label Plus certified.

The Environmental Certification Scheme (ECS) is an environmental labelling scheme for floor coverings in Australia. It is an extension of the internationally recognised Australian Carpet Classification Scheme (ACCS). Certified products must comply with a range of performance criteria to have a current ACCS grading. The Nolan Carpet Tile Collection has Level 4 ECS certification which is the highest available under this scheme. This is primarily driven by our product stewardship program which is outlined below.

The Nolan Carpets product stewardship program is a three-way partnership with TOLI Corporation and the respected Japanese recycling organisation, Taibo. (www.taibo.co.jp) The collaboration allows for used carpet tiles to be recycled and the raw content used in future carpet tile production.

1. Used TOLI carpet tiles can be up lifted and returned to any of the 6 Nolan Carpets locations throughout Australia. They must be returned in a neat and tidy fashion and at the installer's expense. Upon arrival, the carpet tiles will be packaged with other returned tiles and shipped to the bulk Nolan distribution centre in Melbourne. A shipping container dedicated to this program is then loaded with returned tiles.
2. Once the container is completely full, it will be shipped to the Taibo recycling facility in Gifu Japan
3. Taibo step into the equation from here using their state-of-the-art recycling facility. Firstly, they separate the PVC backing and Nylon yarn. From there the 2 components go through a number of conversion processes.
 - All the separated PVC backing is converted to PVC pellets so it can be used in the backing of new carpet tiles.
 - The stripped nylon fibres from the carpet pile will be delivered to another recycling manufacturing line, converted into RPF (refuse paper and plastic fuel) and used for paper manufacturing.
4. The final step in the process is that TOLI take delivery of the recycled PVC pellets and use them in the manufacture of new carpet tiles. This completes the closed loop product stewardship program, ensuring minimal impact to the environment.

The Nolan Carpets Product Stewardship program is available for any commercial TOLI carpet tile project. Nolan Carpets and TOLI Corporation will continue to focus and commit to improving our processes and materials for long term sustainability, securing a better future for generations to come.

SILKY LINE

GA100W
