Nolan Carpets is a division of the Nolan Group. With over 100 years experience, we've become the 'house of brands' in the Australian commercial and education textiles industry.

Here at the Nolan Group, we work with schools to find the right textile solutions. We help set your students up for success with enhanced learning areas that improve learning outcomes.

Our textiles are durable and dependable; dynamically designed, easy to maintain and built to last – even in a bustling school environment.

We've built a reliable, reputable network of trading partners - here, and overseas - to ensure fast and efficient customer service, contact with contract installers and delivery.

Our national team of sales managers and customer service representatives work with trimmers, fabricators, manufacturers, installers, retailers, wholesalers, specifiers and designers Australia-wide - a network we will share with you to start and complete projects in set timeframes.

CARPET & CARPET TILES

Creating safe spaces and driving positive educational outcomes

Nolan Carpets are the exclusive Australian partner of TOLI Corporation from Japan. We partner with architects, interior designers, contractors, retailers and installers to deliver long-lasting, durable flooring solutions.

- Carpet tiles
- Indoor/ outdoor fibre-bonded carpets
- Woven vinyl tiles

We stock 7 contemporary carpet tile ranges ideal for projects that need to be completed quickly during school holidays.

Our indoor/ outdoor fibre-bonded carpets prevent noise reverberation in hallways and prevent slipping on ramps and decks when wet.

ACOUSTICS

Create balanced, peaceful and productive spaces.

Speech intelligibility is crucial to learning and development. Studies show that students in classrooms with no acoustic treatment miss every fourth word, making it difficult for them to understand what is being taught. To help you design and build quality learning environments, Autex Acoustics® are designed to control excessive noise and echo in classrooms—creating balanced, peaceful, productive spaces.

- Composition® is a popular and interactive alternative to paint
- Pinboard, hook and loop receptive surface
- Durable and easily maintained
- No dry time during installation
- Targets speech frequencies
- Improves speech intelligibility
- Carbon neutral
- Made locally

COLA'S & COVERED WALKWAYS

Businesses can operate outdoors in any weather with Outdoor Connex

Outdoor Connex is an Australian designed and made collection of temporary or semi-permanent outdoor marquees.

- 6m x 3m modular outdoor structure (custom sizes available)
- 2022 Good Design Award for product development
- Wind-rated up to 140km/h
- Simple and low-impact installation
- Wide range of lighting and heater options
- School COLAs and covered walkways

The frames can be fitted with 6 Ziptrak® blinds and PVC wall panels to enclose the space & block wind. The weather-protected structures allow hospitality venues to operate outdoors, year-round and in any weather.

SHADE SAILS & STRUCTURES

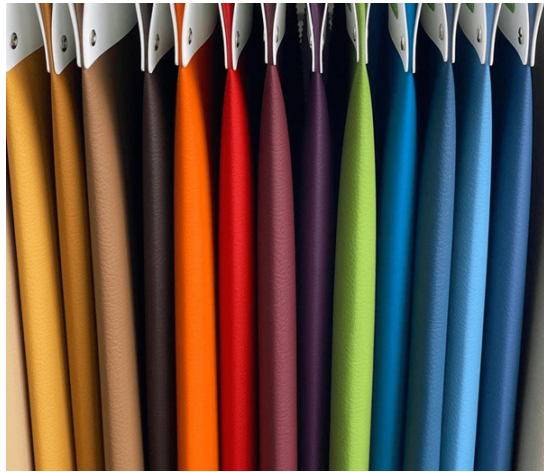

Sun protection where it counts

Polyfab™ is Australia's leading provider of shade protection - offering market-leading 99.8% UVR, equivalent to SPF 50, in the new heavy-duty Xtra shade cloth range.

- Installed over playgrounds, outdoor seating, bike lockers, basketball courts, courtyards and car parks worldwide
- Highest level of UVR protection in the market
- Long lasting
- Comprehensive range of fabrics with contemporary and vibrant colours
- Up to 15 year warranty

HIGH PERFORMANCE UPHOLSTERY

Create inviting, engaging and inspiring classrooms

Our vinyl fabrics and woven upholstery are the next generation in commercial upholstery. They are the ideal choice for commercial furniture and paneling in education facilities where durability, cleanliness and infection control are high priorities.

- SILVERGUARD® finish to diminish odours and prevent bacteria and mould from developing
- PermaShield™ coating removes stubborn stains and graffiti with ease
- Abrasion resistance
- Fire retardant
- UV stabilised colours
- Durable
- Marine grade for indoor and outdoor applications
