SHADE & TENSILE STRUCTURES

With over 100 years experience, we've become the 'house of brands' in the Australian commercial and industrial textiles industry.

Here at the Nolan Group, we work with councils to find the right textile solutions. To set you up for success. And to help you develop your local area with inviting public spaces featuring textile structures.

Our textiles are durable and dependable; dynamically designed, and built to last - even in Australia's harsh climate.

We've built a reliable, reputable network of trading partners - here, and overseas - to ensure fast and efficient customer service and delivery.

Our national team of account managers and customer service representatives work with trimmers, fabricators, manufacturers, installers, retailers, wholesalers, specifiers and designers Australia-wide - a network we will share with you to develop your local area.

Businesses can operate outdoors in any weather with Outdoor Connex

Outdoor Connex is an Australian designed and made collection of cast iron temporary or semi-permanent outdoor marquees.

- Modular and custom designs are available
- 2022 Good Design Award for product development
- Wind-rated up to 140km/h
- Simple and low-impact installation
- Wide range of lighting and heater options
- Hospitality, education and more
- Dining districts

The frames can be fitted with 6 Ziptrak® blinds and PVC wall panels to enclose the space & block wind. The weather-protected structures allow hospitality venues to operate outdoors, year-round and in any weather.

BLINDS & AWNINGS

Protect businesses with Ziptrak® blinds

Connect indoor and outdoor environments into a single, harmonious space with Ziptrak® outdoor blinds. When paired with Vistaweave mesh or Achilles clear PVC, Ziptrak® blinds offer protection from wind, rain, glare, insects, and extreme temperatures.

- **Easy to use:** The unique, cordless Ziptrak® blinds can be quickly and easily be raised, lowered and locked in at any height.
- **Durable:** Ziptrak® blinds are built to withstand high winds, warping, rust, and corrosion. The fabric used in Ziptrak blinds is also designed to withstand UV rays, fading, and mildew.
- **Versatile:** Ziptrak® blinds come in a range of fabrics, colours, and styles to suit different preferences and needs.

The Nolan Group are the national distributor for Ziptrak®.

SHADE SAILS & STRUCTURES

Sun protection where it counts

Polyfab[™] is Australia's leading provider of shade protection - offering market-leading 99.8% UVR, equivalent to SPF 50, in the new heavy-duty Xtra shade cloth range.

- Installed over pools, playgrounds, schools, car parks, event spaces, architectural shade structures worldwide
- Highest level of UVR protection in the market
- Long lasting
- Comprehensive range of fabrics with contemporary and vibrant colours
- Up to 15 year warranty

Atlas advanced membranes are ideal for sports stadiums, school structures, hospitality venues, building facades, and more.

UPHOLSTERY, FLOORING & ACOUSTICS

Make public spaces more appealing, safer and more accessible

Help locals enjoy the ambience and stay longer in council areas.

Nolan Carpets commercial ranges are durable, hard wearing, UV stabilised, stain-resistant, fire retardant, static-neutral, anti-slip, and won't zipper or fray.

Our demand for excellence in commercial upholstery is uncompromising, sourcing materials that are meticulously tested for quality, design, and durability.

Create, cut, mould, print and install high-performance acoustic walls, and ceilings to enhance the auditory experience in open spaces.
