COMPANY PROFILE

NOLAN CARPETS – ABOUT THE TOLI PARTNERSHIP

In 1919, TOLI Corporation was established in Itami, Japan. Over a century later the company has grown to be one of the largest floor covering manufacturers in the world. The TOLI product range is exported all over the globe and has a proven history of success. Independent reports position TOLI in the top five carpet tile manufacturers worldwide.

The TOLI design team have taken innovation to new heights. Their unique designs and concepts have resulted in six 'Good Design' awards over the past decade. TOLI was the first to market with a 'plank' shaped carpet tile in 2006.

Design and innovation are important, but performance is paramount. Like all Japanese manufacturers, TOLI prides itself on using 'cutting edge' technology to produce high quality products. They have five 'state of the art' manufacturing facilities, each playing an integral role in producing their comprehensive product range.

Each range is put through rigorous testing and is supported with a 15-year performance warranty.

Nolan Carpets are proud to be the exclusive Australian partner of TOLI Corporation. Our partnership is based on common values including longevity, quality and innovation.

- Carpet Tiles and Carpet Planks
- Luxury Vinyl Tiles

ENVIRONMENTAL STATEMENT

The Nolan Carpets Tile Collection has been developed with a sense of social responsibility and commitment to the environment. From the manufacturing process through to post-life stewardship, consideration has been given to the direct impact on the environment.

Nolan Carpet tiles meet some of the most stringent requirements worldwide, however the hard work does not stop there. Our manufacturing partner, TOLI, is committed to formal environmental management plans with a long term commitment to sustainability.

Green Label certification is part of the Carpet and Rugs Institute (CRI) in the United States. The CRI mission is to educate consumers, commercial stakeholders, and the industry in general about carpet and rugs in the context of environmental awareness.

Green Label is an internationally recognised environmental certification scheme which has been in place for over two decades. Green Label 'Plus' is the highest level available under this scheme. The Nolan Carpet Tile Collection is Green Label Plus certified.

The Environmental Certification Scheme (ECS) is an environmental labelling scheme for floor coverings in Australia. It is an extension of the internationally recognised Australian Carpet Classification Scheme (ACCS). Certified products must comply with a range of performance criteria to have a current ACCS grading. The Nolan Carpet Tile Collection has Level 4 ECS certification which is the highest available under this scheme. This is primarily driven by our product stewardship program which is outlined below.

CONTENTS

Your Vision, Delivered Fast

At Nolan Carpets, we understand that time, convenience and cost are important factors in running your business. That's why we stock an extensive range of high-quality, Japanese carpet tiles to bring your design ideas to life.

Our stocked tiles are ready and available across all Nolan locations, ensuring efficient shipping and delivery, so you can focus on the bigger picture.

ENVIRONMENTALLY-FRIENDLY CARPET TILE BACKING

Shine Rhombus, Lattice Valley, Calm Horizon and Luster Flow feature TOLI's SUSTIVE BACK - an environmentally-friendly carpet tile backing made with **43% recycled material**. Recycling of carpet tile waste materials will contribute to the reduction of industrial waste.

ACOUSTIC BACKING: SOFT BACK PLUS

Soft Back Plus is a cushion backing that can be applied to the underside of most ranges in the Nolan Carpet Tile Collection. The soft yet resilient backing is manufactured using 60% recycled content and provides 2 primary benefits.

The most obvious feature is underfoot comfort feel equal to a traditional commercial carpet installed with an underlay. It helps reduce the fatigue in environments where people are spending large amounts of each day on their feet.

The second and certainly not to be under estimated is the acoustic performance. It provides reduced reverberation within a room but more importantly the sound transfer reduction when used in multi-level buildings.

TOLI AI SIMULATOR IMAGE FIT

TOLI Ai Simulator, Image Fit is a simulation system that can easily create an installation image by synthesizing the TOLI interior materials into your design space. It is also compatible with the room image you take with your smartphone, etc., so please enjoy combinations of various product images into your own room image.

TOLI Ai Simulator
Image Fit

You can use
Image Fit from
this QR code.

For any space design

Photos taken by smartphones can be used. Image Fit will help you visualise the design.

Authentic image in high quality

Room images are created with an appropriate scale. You can also choose the coordinated design provided in the library.

Quick and easy simulation

Just choose the room image and the product for simulation, and option of installing direction, then the synthesised image will come out right away.

SHINE RHOMBUS

GA 3 6 0 0

Drawing inspiration from the image of translucent ice gently spreading across a serene lake surface, Shine Rhombus carpet tiles encapsulate this natural wonder.

SUSTIVE BACK is the exclusive name for our environmentally friendly carpet tile backing made with 43% recycle chips from used carpet tiles.

PERFORMANCE

INSTALLATION

DUST CONTROL

DC1100

The optimal combination for preserving indoor aesthetics and safety. Using our dust control product, divide any entrance into two zones to effectively remove dirt and moisture.

The opening among piles of the carpet tile is called a dust pocket, and the dirt will drop from shoe soles and accumulate in this dust pocket - absorbing a larger amount of dust and sand compared to ordinary carpet tiles. The ample opening will make the vacuum maintenance much easier compared to ordinary carpet tiles and the dust pocket is kept well by durable piles to help continuous performance of maintenance.
