

# EXCHROME

## CUSTOM PRINTED TILES

Exchrome is a range of heavy duty commercial carpet tiles that utilise jet printing technology to create your own custom design. It is the ultimate option with the flexibility to create a flooring space with your own custom choice of colour, texture and design. Imagine having the flexibility to match a piece of artwork, the theme of a commercial interior, or simply increase the corporate brand awareness by having a logo printed onto the floor. The custom options are endless and open up potential that was previously considered nothing more than a desire to be unique.

**STEP 1:** Get inspired by considering the endless possibilities available with the Exchrome jet-printing process.

**STEP 2:** Select your desired finish from one of the three textured options available.

MULTI-LEVEL LOOP PILE

CUT & LOOP PILE

**STEP 3:**

Prepare and submit your design artwork to the specifications provided by Nolan Carpets, or choose from one of the standard TOLI options.

## STEP 4:

Review the electronic prototype prepared by TOLI and approve if satisfied.

## STEP 5:

Review the prototype sample file based on your request and approve if satisfied.

## STEP 6:

Place a purchase order and wait approx. 8 weeks for delivery.

## STEP 7: Stand back and watch your masterpiece take shape!
